### **LECTURE PLAN (THEORY) — 20 Lectures**

*(The remaining 20 lectures of this 40-lecture course are conducted as Lab Practice sessions in the MS Word / MS Excel / MS PowerPoint computer laboratory, directly applying each corresponding theory lecture below.)*

| <b>Lectures No.</b> | <b>Topic</b>                                                                                                                                           | <b>Reference</b> | <b>Teaching Method(s)</b> |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|---------------------------|
| 1                   | <b>L1:</b> Introduction to MS-Word: screen layout & Ribbon; Text basics – typing, alignment; Editing text (Cut/Copy/Paste, Select All, Find & Replace) | T1, T3           | C&T, S/P, DEMO            |
| 2                   | <b>L2:</b> File operations (New, Open, Close, Save, Save As); Formatting text & paragraphs – font, line/paragraph spacing, tabs & indents              | T1, T3           | C&T, S/P, DEMO            |
| 3                   | <b>L3:</b> Styles & Content – built-in/custom styles, list styles; Table of Contents & references; Footnotes and Endnotes                              | T1, T3           | C&T, S/P, DEMO            |
| 4                   | <b>L4:</b> Bullets & Multilevel Numbered Lists; Working with Objects – Shapes, Pictures, WordArt, SmartArt, Columns, Text Boxes, Symbols               | T1, T3           | C&T, S/P, DEMO            |
| 5                   | <b>L5:</b> Working with Tables (creating, formatting, merge/split); Borders & Shading; Header & Footer with Section Breaks                             | T1, T3           | C&T, S/P, DEMO            |
| 6                   | <b>L6:</b> Mail Merge – recipients, merge fields, rules, finish & merge; Proofing the document; Page Setup and Printing                                | T1, T3           | C&T, S/P, DEMO            |
| 7                   | <b>L7:</b> Introduction to the MS-Excel environment – Workbook & Worksheet, Rows/Columns/Cells, navigating & entering data                             | T2, T3           | DEMO, LAB                 |
| 8                   | <b>L8:</b> Formatting cells & data – number formats, wrap/merge, conditional formatting; Worksheet management, freezing panes                          | T2, T3           | DEMO, LAB                 |
| 9                   | <b>L9:</b> Creating simple formulas; Relative, Absolute & Mixed cell referencing                                                                       | T2, T3           | DEMO, LAB                 |
| 10                  | <b>L10:</b> In-built functions I – SUMIF, COUNTIF, COUNTA, logical function IF, Lookup functions VLOOKUP/HLOOKUP                                       | T2, T3           | DEMO, LAB                 |

| Lectures No.                                                                                                                                            | Topic                                                                                                                   | Reference | Teaching Method(s) |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|-----------|--------------------|
| 11                                                                                                                                                      | <b>L11:</b> In-built functions II – Financial, Statistical, Mathematical, Text, Database and Date & Time functions      | T2, T3    | DEMO, LAB          |
| 12                                                                                                                                                      | <b>L12:</b> Sorting & Filtering data – number/text/custom filters; Creating Sub-totals                                  | T2, T3    | DEMO, LAB          |
| 13                                                                                                                                                      | <b>L13:</b> Pivot Tables; Creating and formatting Charts (Column, Line, Pie) and Excel Tables                           | T2, T3    | DEMO, LAB          |
| 14                                                                                                                                                      | <b>L14:</b> Advanced list management – INDEX & MATCH; Forms and Form Controls; Drawing & Picture objects in Excel       | T2, T3    | DEMO, LAB          |
| 15                                                                                                                                                      | <b>L15:</b> Proofing & Printing a spreadsheet – Print Area, Print Titles, Page Setup, background error checking         | T2, T3    | DEMO, LAB          |
| 16                                                                                                                                                      | <b>L16:</b> Setting up the PowerPoint environment; Creating slides & applying Themes; Formatting text                   | T1, T3    | S/P, DEMO, LAB     |
| 17                                                                                                                                                      | <b>L17:</b> Bullets & Numbering in PPT; Working with Objects – Shapes, Pictures, WordArt, SmartArt, Slide Header/Footer | T1, T3    | S/P, DEMO, LAB     |
| 18                                                                                                                                                      | <b>L18:</b> Hyperlinks & Action Buttons; Working with Movies and Sound (audio/video playback options)                   | T1, T3    | S/P, DEMO, LAB     |
| 19                                                                                                                                                      | <b>L19:</b> Tables & SmartArt in PowerPoint; Animation and Slide Transition                                             | T1, T3    | S/P, DEMO, LAB     |
| 20                                                                                                                                                      | <b>L20:</b> Slide Show options (Rehearse Timings, Custom Slide Show); Proofing & Printing; Save as Video/JPEG/Show file | T1, T3    | S/P, DEMO, LAB     |
| <p align="center"><b>Total Lectures (Theory) = 20</b><br/> <b>(Remaining 20 Lectures are allotted to Lab Practice as per the course structure.)</b></p> |                                                                                                                         |           |                    |

**Teaching Methods:** C&T: Chalk & Talk; S/P: Slides/PPT & Videos; SEM: Seminar; DEMO: Demonstration; CHART; ET/GL: Expert Talk/Guest Lecture; QUIZ; GD: Group Discussion; RTCS: Real Time Case Studies; JAR: Journal Article Review; PD: Poster Design; LAB: Laboratory demonstration.
